# TV-lift TS460

## Component specifications

Metal sheet parts: St 37-2  
 Gear parts: St 70-2  
 Gear motor: CSE 24V 300047  
 Power supply: 100 W AC SMPS Power Transformer  
 Consumption: 100 Watts; Standby: 0,01 Watts  
 Plastic components: PEHD, POM  
 Surface treatment: Visible metal parts powder coated in "alu" colour.  
 Non visible metal parts are surface treated (e.g. zinc plated)

Lifting capacity: 50 kg  
 Height: 64,5-110,5 cm  
 Depth: 4 cm  
 Speed: 25 mm/sec

The electric components should be connected after mounting the lift.

All wires have DC jacks and since different types (size- male/female) have been used, only the correct connection can be made.

The mechanism can now be operated up and down using the supplied remote unit. Push "+" and the lift will expand.

All products come with an instruction manual.
