

Manual Drop Down Screens

Our manual screen has been designed with a contemporary, minimalist style. The screens will perfectly complement any setting and are sturdy enough frequent use

Design

- Adjustable channel fixing L-brackets make ceiling or wall in stallation extremely easy.
- Simple clip on installation is even adjustable left to right.
- The aluminium outer case is stylish and durable.
- Installation is suitable for any flat surfaces, the screens are suitable for entertainment venues, home entertainment use etc

Screen Fabric

- The fabric is a matt white 1:1 gain with a lovely flat surface
- Multi-layered construction with fiber glass backing helps screen remains taut and prevents any V-waves from forming.
- The projection surface utilizes unique materials creating a smooth surface for superior image quality. The flexible projection surface is suitable for all occasions and ensures a color-rich reflection and sharp pictures.

All screens ship as standard with black borders to increases the perceived qualities of the projected image.

Heavy duty spring roller to ensure that the screen fabric is kept taut.

Simplistic pull-out system locks at every desired viewing height.

Integrated mounting points so the screen can be wall or ceiling mounted.

Supplied with a weighted bar to ensure the screen fabric is kept taut.

Pull handle integrated into weighted bar.

Supplied with extra black border on upper side of the screen in 4:3 and 16:9 format to ensure that the screen can be positioned at optimal viewing height.
